

DAILY PROGRAM OF MACOS, AUG. 25TH

8:30-8:50	Registration
8:50-9:00	Opening Remarks from Chairman
	Chair: Hideki Yorimitsu (Kyoto University)
9:00-9:30	SL-01 David J. Procter (University of Manchester) <i>New Cross-Couplings Mediated by Sulfoxides</i>
9:30-10:00	SL-02 Chin-Fa Lee (National Chung Hsing University) <i>Copper-Catalyzed Cross-Coupling of Thiols with Unactivated Aryl Chlorides</i>
10:00-10:30	SL-03 Koji Hirano (Osaka University) <i>Phosphination of Alkenes and Alkynes with Phosphinyl Radicals and Phosphenium Cations of Unique Reactivity</i>
10:30-10:50	Break
	Chair: Nuno Maulide (University of Vienna)
10:50-11:20	SL-04 Michael Willis (University of Oxford) <i>New Reagents for Heterocycle Coupling Reactions</i>
11:20-11:50	SL-05 Manuel Alcarazo (Georg-August-University Göttingen) <i>α-Cationic Phosphines and Arsines: Synthesis and Applications</i>
11:50-12:05	IL-01 Naoki Ishida (Kyoto University) <i>Synthetic Approach to Benzocyclobutenones Using Visible Light and a Phosphonate Auxiliary</i>
12:05-12:20	IL-02 Takashi Niwa (RIKEN Center for Biosystems Dynamics Researches) <i>Synthesis of a Fluoroalkene Mimic of an Amide Drug via Copper-Catalyzed Defluoroborylation of (2,2-Difluorovinyl)arenes</i>
12:20-13:00	Lunch and Poster Session
13:00-14:00	Poster Session
14:00-14:10	Arrange
	Chair: Koji Hirano (Osaka University)
14:10-14:40	SL-06 Nuno Maulide (University of Vienna) <i>The beautiful simplicity of rearrangements: sulfur as a versatile element</i>

14:40-15:10	SL-07 Toshifumi Dohi (Ritsumeikan University) <i>Oxidative Coupling Using μ-Oxo Hypervalent Iodine Reagent</i>
15:10-15:25	IL-03 Yusuke Kobayashi (Kyoto University) <i>Organocatalytic Direct N-Glycosylation of Amides with Glycosyl Trichloroacetimidates</i>
15:25-15:40	IL-04 Yoshihiro Miyake (Nagoya University) <i>Diversity-Oriented Synthesis of Hetero[8]circulenes through Direct C-H Borylation of Tetrathienylene</i>
15:40-16:00	Break
	Chair: Jun Shimokawa (Kyoto University)
16:00-16:15	IL-05 Kazuhiko Semba (Kyoto University) <i>Carboboration of Alkenes by Cooperative Metal Catalysis</i>
16:15-16:30	IL-06 Hayato Tsurugi (Osaka University) <i>Dehalogenation of Vicinal Dihaloalkanes and Dihaloalkenes by Organosilicon Compounds in a Salt-free Manner</i>
16:30-16:45	IL-07 Masayuki Iwasaki (Okayama University) <i>Regio- and Stereoselective Halothiolation of Alkynes Controlled by Transition-Metal Catalysts</i>
16:45-17:00	IL-08 Masakazu Nambo (Nagoya University) <i>Modular Synthesis of Multiply-arylated Alkanes through Desulfonylative Cross-Coupling Reactions</i>
17:00-17:30	SL-08 Xuefeng Jiang (East China Normal University) <i>Polysulfurating Reagents Design for Unsymmetrical Polysulfides Construction</i>
17:30-17:50	Break
	Chair: David J. Procter (University of Manchester)
17:50-18:20	SL-09 Daisuke Uraguchi (Nagoya University) <i>Molecular Design, Synthesis, and Asymmetric Catalysis of a Hexacoordinated Chiral Phosphate Ion</i>
18:20-18:50	SL-10 Patrick Walsh (University of Pennsylvania) <i>New Reactivity Enabled by Cation-π Interactions</i>
18:50-19:00	Closing Remarks from Chairman
19:15-	Mixer (La Tour, Moderator: Toshiaki Murai)
