We cordially invite your participation in the 10th International Symposium on Carbanion Chemistry (ISCC-10) to be held in Kyoto on September 23–26, 2013. The symposium will be held in Japan for the second time, and follows the successful series of ISCC symposia in Florence (2010), Madison (2007), Alicante (2004), Marburg (2001), Sendai (1998), Fort Collins (1995), Gallipoli (1992), Ottawa (1989), and Durham (1984).

The aim of ISCC is to cover all the aspects of carbanion chemistry (synthetic, mechanistic, structural, theoretical, and applied) and to promote exchange of ideas and collaborations among participants. We strongly encourage younger scientists to attend the meeting in order to get in touch and see, first hand, the state of the art in the field. To this end, a reduced registration fee is available for young participants.

The symposium program will feature special lecture, plenary lectures, invited lectures, short communications, poster sessions, and exhibitions. The venue for the symposium will be Kambaikan, Doshisha University, which is close to the center of Kyoto city and is well fit to feel Japanese culture, to cultivate our friendships, and to enjoy carbanion chemistry.

We do hope that you will join us to continue the scientific excellence that has been the common feature of the previous symposia and make ISCC-10 a memorable event.

We are looking forward to seeing you in Kyoto in 2013!

Chairman
Kiyoshi Tomioka
